URINARY INCONTINENCE

Is it
controlling
your life?

Do you

- Leak urine when you cough, sneeze, laugh or exercise?
- Have trouble holding when feeling a strong urge to go?
- Have trouble with frequent urination (more than 6-7 times a day)?

If YES, read below:

Urinary Incontinence is the unintended leakage or loss of urine. It is a common yet embarrassing problem for many women.

What Causes it?

Weak pelvic floor muscles
Pregnancy & childbirth
Bladder infection
Stress
Fibromyalgia
Smoking
Caffeine
Constipation

You CAN:

- ✓ **Get Control** over your bladder and your life
- ✓ **Save Embarrassment**
- ✓ **Save Money** by less use of pads and undergarments
- ✓ **Reduce Medication** use for incontinence
